

SALES PULSE 360

Sales Performance, Profitability & Business Intelligence Dashboard

Business Report — Manoj Chaurasiya

Executive Summary

The analysis converts transactional sales data into management-oriented KPIs and performance views. Total sales are ■32,571,599, total profit is ■5,361,629, profit margin is 16.46%, total orders are 600, and average order value is ■54,286.

Business Problem

Management needs to understand whether revenue growth is translating into profit, which regions and products perform strongly, where margin pressure exists, and how salesperson performance differs.

Data Preparation

The raw data was reviewed for duplicates, inconsistent spacing/capitalization, date formatting, missing salesperson values and suspicious discount levels. Text fields were standardized, missing salesperson values were assigned as Unassigned, duplicates were removed, and calculated Sales and Profit fields were validated.

Excel Analysis

KPI	Value
Total Sales	■32,571,599
Total Cost	■27,209,970
Total Profit	■5,361,629
Profit Margin	16.46%
Total Orders	600
Average Order Value	■54,286
Total Quantity	2,664

Regional finding: East generated the highest revenue at ■7,718,764. East generated the highest profit at ■1,368,244.

Product finding: Business Laptop generated the highest profit among analyzed products.

Salesperson finding: Neha Gupta generated the highest revenue, while Unassigned had the highest profit margin.

Power BI Dashboard Specification

Main page: KPI cards for Total Sales, Total Profit, Profit Margin, Total Orders and Average Order Value; monthly sales trend; sales and profit by region; top 10 products by sales and profit; salesperson performance; and Sales vs Profit.

Interactive slicers: Date, Region, Category, Sub-category, Segment and Salesperson.

Management Insights page: at least five data-backed findings and three business recommendations.

Key Findings & Recommendations

- **Positive:** East generated the highest revenue at ■7,718,764.
- **Positive:** East generated the highest profit at ■1,368,244.
- **Positive:** Neha Gupta generated the highest salesperson revenue at ■5,164,959.
- **Concern:** Central has the lowest regional profit margin at 14.8%.
- **Concern:** Business Laptop has the lowest product-level margin among the analyzed products.
- **Review discounting:** Transactions above 15% discount should be investigated for margin leakage.
- **Focus on low-margin regions:** Compare pricing, product mix and discount behavior in the lowest-margin region.
- **Optimize product mix:** Prioritize profitable products while reviewing high-sales products with weak margins.
- **Monitor salespeople on profit as well as revenue:** Revenue alone can hide discount-driven margin pressure.
- **Use monthly management review:** Track sales, profit and margin trends each month to detect changes early.

Limitations & Future Improvements

The dataset used for this completed workbook is a project-ready synthetic transactional dataset because the supplied brief specifies the dataset structure but does not include an official CSV/XLSX dataset. In a real submission, replace the synthetic data with the official company-provided dataset if one is supplied. Future improvements can include a star schema with DimDate, DimProduct, DimCustomer and DimRegion, plus scenario analysis for discount and cost changes.
